

# Course Schedule

UIC College of Dentistry  
801 South Paulina Street  
Room 501

April 8, 2009

9:00 a.m. - 4:00 p.m.

Please proceed to 5th Floor  
Commons for Registration

8:30 a.m.

**Registration &  
Continental Breakfast**

2:30 - 2:45

**Break**

9:00 - 10:45

**Dental Implant  
Therapy for Your  
Practice**

Critical Considerations in  
Diagnosis and Treatment  
Planning

*Dr. Stephen Campbell*

2:45 - 3:00

**Open Discussion -**

Bring the records  
(Radiographs and casts)  
for a patient that you  
would like to discuss  
(diagnose and  
treatment plan)

*Dr. Stephen Campbell*

*Dr. Kent Knoernschild*

10:45 - 11:00 **Break**

11:00 - 12:30 **The Secrets of Dental  
Implant Therapy and  
Esthetics**

*Dr. Stephen Campbell*

3:00 - 4:00

**3-Dimensional Digital  
Planning for Surgical  
and Prosthetic  
Therapy**

*Dr. Kent Knoernschild*

12:30 - 1:15 **Lunch**

1:15 - 2:30 **Predictable Solutions  
using Dental Implants**

*Dr. Kent Knoernschild*

Course provides 6 hours  
of Continuing Education  
Credit.

## Course Instructors

**Stephen Campbell, D.D.S., M.M.Sc.**

*Professor and Head, Department of Restorative Dentistry  
Director, Comprehensive Dental Implant Center  
University of Illinois at Chicago*

Dr. Stephen D. Campbell received his D.D.S. from the Medical College of Virginia. He completed an Advanced Program in Prosthodontics at the Harvard School of Dental Medicine and a Master of Medical Science Degree with a biomaterials focus at Harvard University in conjunction with the Massachusetts Institute of Technology.

Dr. Campbell is a Diplomate of the American Board of Prosthodontics and is active in several dental organizations. He is Past-President of the American College of Prosthodontists, American Board of Prosthodontics, American Academy of Fixed Prosthodontics and the International Association of Dental Research Prosthodontics Section. Dr. Campbell is currently Chair of the American College of Prosthodontists Education Foundation, as well as President of the Academy of Prosthodontics and President of the Greater New York Academy of Prosthodontics.

Dr. Campbell has extensive clinical experience, having spent most of his time providing patient care. Dr. Campbell is currently Professor and Head of the Department of Restorative Dentistry and Director of the Comprehensive Dental Implant Center at the University of Illinois at Chicago. He has been active in dental research throughout his career having been the principal investigator for several NIH grants dealing with ceramics.

**Kent L. Knoernschild, D.M.D., M.S.**

*Associate Professor, Department of Restorative Dentistry  
Director, Advanced Education Program in Prosthodontics  
Co-Director, Comprehensive Dental Implant Center  
University of Illinois at Chicago*

Dr. Kent L. Knoernschild received his D.M.D. from Southern Illinois University (1986) and his Advanced Prosthodontics training and M.S. from the University of Iowa (1990). He is Director of the Advanced Education Program in Prosthodontics and Co-Director of the Comprehensive Dental Implant Center at the University of Illinois at

Chicago. Dental implant patients are the vast majority of his daily patient contact.

Dr. Knoernschild is a Diplomate of the American Board of Prosthodontics and has a private practice limited to Prosthodontics.

Dr. Knoernschild has lectured internationally and published numerous papers addressing biocompatibility of prosthodontic restorations. His lectures have also focused on an evidence-based decision-making strategy for clinicians that help them make the best decisions in daily practice.

He is active in several organizations including the American College of Prosthodontists, the Academy of Prosthodontics, the Academy of Osseointegration, and the American Academy of Fixed Prosthodontics. He is President of the American Academy of Fixed Prosthodontics and a past President for the International Association for Dental Research Prosthodontics Group.

## Course Descriptions

### Dental Implant Therapy for Your Practice

#### Critical Considerations in Diagnosis and Treatment Planning

*Dr. Campbell 9:00 - 10:45*

Prosthodontic patient care makes up more than 50% of the revenue for the average general practice. Practice trends suggest that this will continue to expand in the coming decades. Over 200 million Americans are currently impacted by partial and/or complete edentulism, and projections are for this to increase with the aging of the population. This has a significant effect on the quality of life for our patients.

Are you still replacing teeth using the conventional means you were taught in dental school? Patient care has changed in a way that few envisioned. Changing technology and patient care trends have expanded our scope of patient therapy. As a result, the first choice treatment alternatives and most appropriate care for our patients have changed.

The presentation will review how best to make implant care a significant part of your practice and patient care, as well as establishing an understanding of the critical aspects of diagnosis and treatment planning.

The presentation will review the demographics of the partially and completely edentulous patient populations. It will also compare implant-supported therapy with our conventional alternatives that include fixed and removable prostheses, as well as Endodontics.

### The Secrets of Dental Implant Therapy and Esthetics

*Dr. Campbell 11:00 - 12:30*

Do you know the secrets of how to get the best result when replacing teeth with implant supported restorations? Are you afraid to consider this option because of uncertainty in the outcome?

The presentation will provide the critical aspects of patient care needed to maximize the predictability and quality of outcome for our patients and practices. It will consider all aspects of implant-supported care including the restorative dentist as leader of the team, diagnosis, planning, understanding key features of implant system design, establishing the ideal implant location, and the various restorative options for abutments and final restoration (ceramics, etc).

### Predictable Solutions using Dental Implants

*Dr. Knoernschild 1:15 - 2:30*

Patients have an incredible array of therapy options with predictability that surpasses those of past decades. Regardless of the number of missing teeth, significant clinical experience with a breadth of treatment approaches has fostered confidence within the dental community that dental implant therapy can predictably meet patient needs. Using patient situations, this presentation will outline decision-making strategies that help dentists find solutions for their patient's functional and esthetic concerns. Partially and completely edentulous patients will be considered, and patient, implant and prosthesis factors will be discussed as applied to recognized patient benefits.

### Open Discussion Session Patient Planning

*Dr. Campbell, Dr. Knoernschild 2:45 - 3:00*

From beginner to advanced user, this session will allow each participant to have a one-on-one with the Implant Center faculty in planning or evaluating the outcome of care for your patients.

Bring the records (radiographs, casts, and clinical findings) for a patient that you would like to discuss (diagnose and treatment plan).

### 3-Dimensional Digital Planning for Surgical and Prosthetic Therapy

*Dr. Knoernschild 3:00 - 4:00*

Therapy with dental implants has fostered innovations that make practice easier and more predictable. For example, positioning of the implant body as guided by definitive restoration design and contour tooth can be three-dimensionally planned in the virtual world to achieve desirable final prosthetic results using computer tomography and software such as Astra Tech Facilitate or NobelGuide. The need for grafting is readily recognized. Optimum implant length, diameter, inclination, and depth to ideally support the final restoration are identified. For all types of patients - partially or completely edentulous—surgical guides can be fabricated from the software plan that assist the clinician in predictably guiding the implant to the specified position dictated by final restoration contours. This presentation will overview the three-dimensional planning approach and how to apply it for the best surgical and prosthetic results.

## Implant Supported Care for Your Patients: Advancing the Standard

*A Continuing Education Presentation of the 2008-2009  
Dr. Thaddeus V. Weclaw Lecture Series*

*Phone or E-mail registration & payment contact:*

**Mr. Eric J. Pertzborn**  
Clinical Prosthodontics Director  
Department of Restorative Dentistry  
Phone: 312.996.9076  
E-mail: [ejpertz@uic.edu](mailto:ejpertz@uic.edu)

### **Cancellation and Refunds:**

*All cancellations must be received in writing (by phone, fax, or e-mail) and are subject to a \$50 processing fee. A full refund, minus the \$50 processing fee, will be given for cancellations received on or before six weeks prior to the event. A 75% refund, minus the \$50 processing fee, will be given for cancellations received between four to six weeks prior to the event. A 25% refund, minus the \$50 processing fee, will be given for cancellations less than four weeks prior to the event. No refunds will be issued for cancellations*

*received less than three business days prior to a scheduled event.*

*The UIC College of Dentistry reserves the right to cancel any activity due to low participation or other circumstances beyond its control. In the event of a cancellation by the UIC College of Dentistry, registrants will receive a full refund of any registration monies paid. Refunds will be processed within 30 days of the event conclusion. "No Shows" will not be eligible for a refund.*

## **Course Registration Form**

*Implant Supported Care for Your Patients*

*Mail completed registration & payment to:*

**Mr. Eric J. Pertzborn**  
UIC College of Dentistry (MC 555)  
801 South Paulina Street  
Chicago, Illinois 60612

*Completely fill out registration form - please print.  
Only one person may register on this form.  
Additional forms may be copied.*
