

# Interested in Implants?

## Seeking participants interested in research for implant therapy

The UIC College of Dentistry Clinical Research Center is performing a study on the healing & health of tissue around dental implants. The purpose is to determine the difference in tissue healing surrounding different implant materials currently used in dentistry.

Participants will be evaluated for study eligibility, and the research team will provide treatment from implant placement to crown delivery. During a follow-up, a small tissue sample will be collected for the study.

All research activities will be conducted in the UIC College of Dentistry Clinical Research Center according to an approved research protocol. The UIC IRB research protocol number is 20181358 and the Principal Investigator is Dr. Lyndon F. Cooper.

To participate, please contact:

Lyndon F. Cooper, DDS, PhD.
